

프로미스의 필요성

- 여전히 긴 느낌

```
new Promise((resolve) => {
  setTimeout(() => {
    let name = 'Espresso';
    console.log(name);
    resolve(name);
  }, 500);
})
.then((prevName) => {
  return new Promise((resolve) => {
    setTimeout(() => {
      let name = prevName + ', Americano';
      console.log(name);
      resolve(name);
    }, 500);
  });
})
```

```
.then((prevName) => {
  return new Promise((resolve) => {
    setTimeout(() => {
      let name = prevName + ', Mocha';
      console.log(name);
      resolve(name);
    }, 500);
  });
})
.then((prevName) => {
  return new Promise((resolve) => {
    setTimeout(() => {
      let name = prevName + ', Latte';
      console.log(name);
      resolve(name);
    }, 500);
  });
})
```
