

REST 요청의 확인

- 크롬 개발자 도구 - Network 탭
 - 요청 내용을 실시간 확인 가능
 - Name은 요청 주소, Method는 요청 메서드, Status는 HTTP 응답 코드
 - Protocol은 HTTP 프로토콜, Type은 요청 종류(xhr은 AJAX 요청)

The screenshot shows a web application on the left and the Chrome DevTools Network tab on the right. The web application has a header with 'Home' and 'About' links, a search bar, and a '등록' button. Below the search bar are two rows of user information: '이순신' and '안중근', each with '수정' and '삭제' buttons. The Network tab on the right shows a list of requests. The first request is 'localhost' with a GET method, status 200, and type 'document'. Subsequent requests are for 'restFront.css' (stylesheet), 'axios.min.js' (text/plain), 'restFront.js' (script), 'inject.js' (script), 'users' (xhr), and 'user' (xhr).

Name	Method	Status	Protocol	Type
localhost	GET	200	http/1.1	document
restFront.css	GET	200	http/1.1	stylesheet
axios.min.js	GET	302	h2	text/plain
restFront.js	GET	200	http/1.1	script
axios.min.js	GET	200	h2	script
inject.js	GET	200	chrome-extension	script
users	GET	201	http/1.1	xhr
user	POST	201	http/1.1	xhr
