

Jenkins 플러그인 설치

- 플러그인 설치
 - Jenkins 관리 > Tools

The screenshot shows the Jenkins configuration page for the NodeJS plugin. The main form is titled "NodeJS" and has a "Name" field set to "my-nodejs". The "Install automatically" checkbox is checked. Below this is a dashed box containing the "Install from nodejs.org" section. This section includes a "Version" dropdown menu set to "NodeJS 23.2.0", a checkbox for "Force 32bit architecture" which is unchecked, a text field for "Global npm packages to install" containing "pm2", and a text field for "Global npm packages refresh hours" set to "72". At the bottom of the dashed box is an "Add Installer" button with a dropdown arrow.

NodeJS

Name

my-nodejs

☒ Install automatically ?

Install from nodejs.org

Version

NodeJS 23.2.0

For the underlying architecture, if available, force the installation of the 32bit package. Otherwise the build will fail

☐ Force 32bit architecture

Global npm packages to install

Specify list of packages to install globally -- see npm install -g. Note that you can fix the packages version by using the syntax `packageName@version`

pm2

Global npm packages refresh hours

Duration, in hours, before 2 npm cache update. Note that 0 will always update npm cache

72

Add Installer
